Student Record Management System Using Python Tkinter

Name: Divyanshu Singh and Sumeet kumavat

Class/Batch: SY-Bsc.IT

Roll No: S039 , S019

1. Project Description:

The Student Record Management System is a simple Python project developed using Tkinter. It is used to add and manage student records. The user can enter the Roll Number, Student Name, and Course. The entered student details are displayed in a list. The user can also select and delete a student record. This project provides a simple graphical interface and makes student record management easy.

2. Code Snippet:

```
import tkinter as tk
from tkinter import messagebox

root = tk.Tk()
root.title("Student Record Management System")
root.geometry("500x500")

def add_student():
    roll = roll_entry.get()
    name = name_entry.get()
    course = course_entry.get()

    if roll and name and course:
        students.insert(tk.END, f"{roll} | {name} | {course}")

        data = list(students.get(0, tk.END))
        data.sort(key=lambda x: int(x.split(" | ")[0]))

        students.delete(0, tk.END)

        for item in data:
            students.insert(tk.END, item)

        roll_entry.delete(0, tk.END)
        name_entry.delete(0, tk.END)
        course_entry.delete(0, tk.END)
    else:
        messagebox.showwarning("Warning", "Please enter all details")

def delete_student():
    selected = students.curselection()

    if selected:
        students.delete(selected)
    else:
        messagebox.showwarning("Warning", "Select a student")

tk.Label(
    root,
    text="Student Record Management System",
    font=("Arial", 16, "bold")
).pack(pady=15)

tk.Label(root, text="Roll No.").pack()
roll_entry = tk.Entry(root)
roll_entry.pack(pady=5)
```

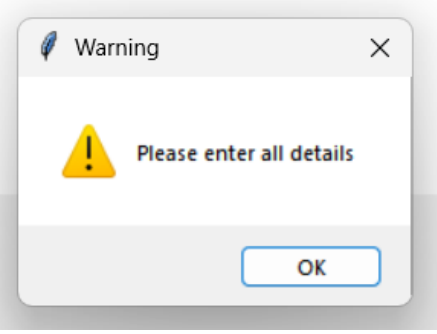

```
tk.Button(
    root,
    text="Add Student",
    command=add_student,
    width=15
).pack(pady=10)

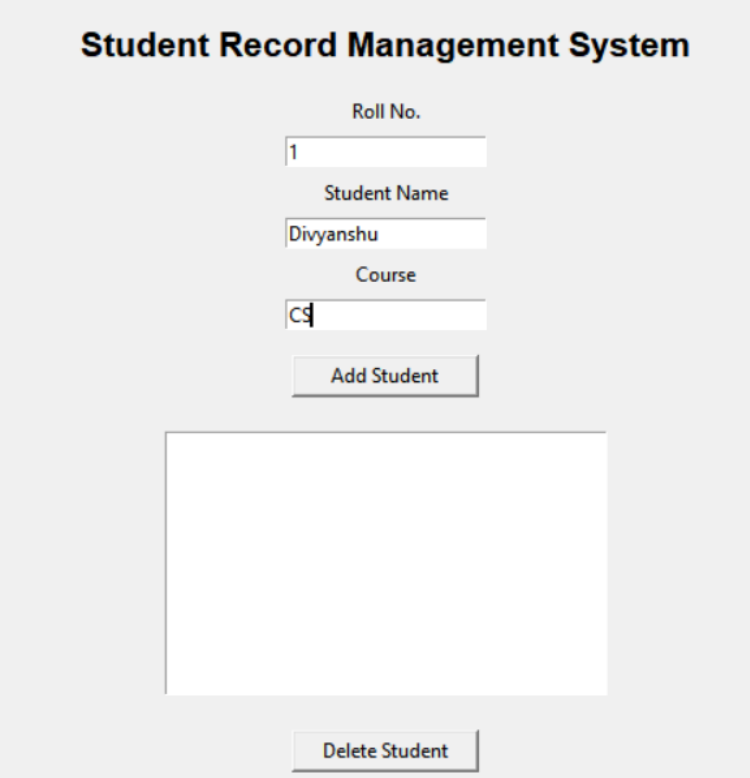

students = tk.Listbox(root, width=45, height=10)
students.pack(pady=10)

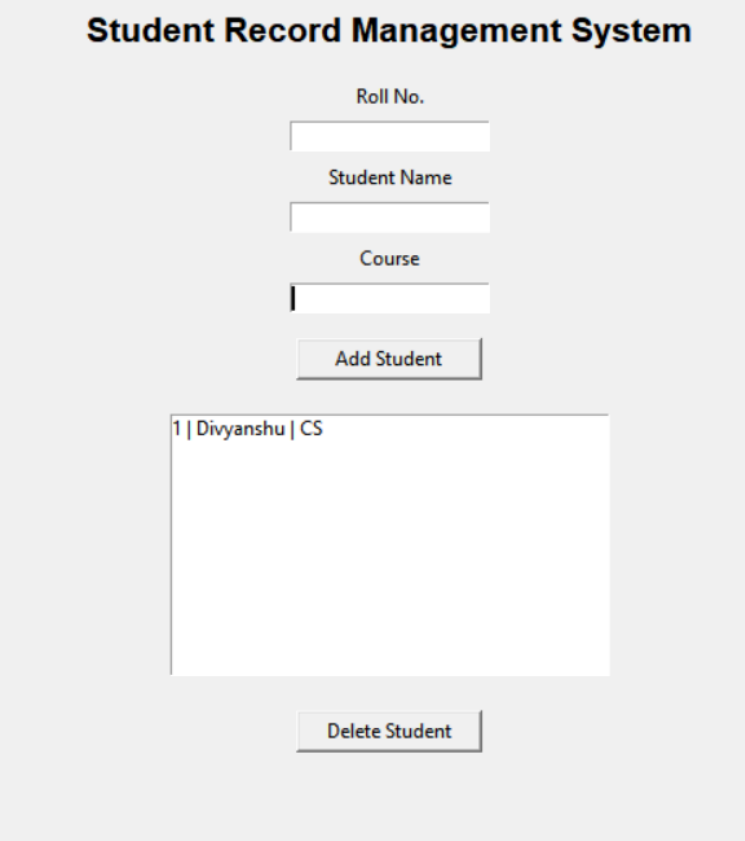

tk.Button(
    root,
    text="Delete Student",
    command=delete_student,
    width=15
).pack(pady=10)

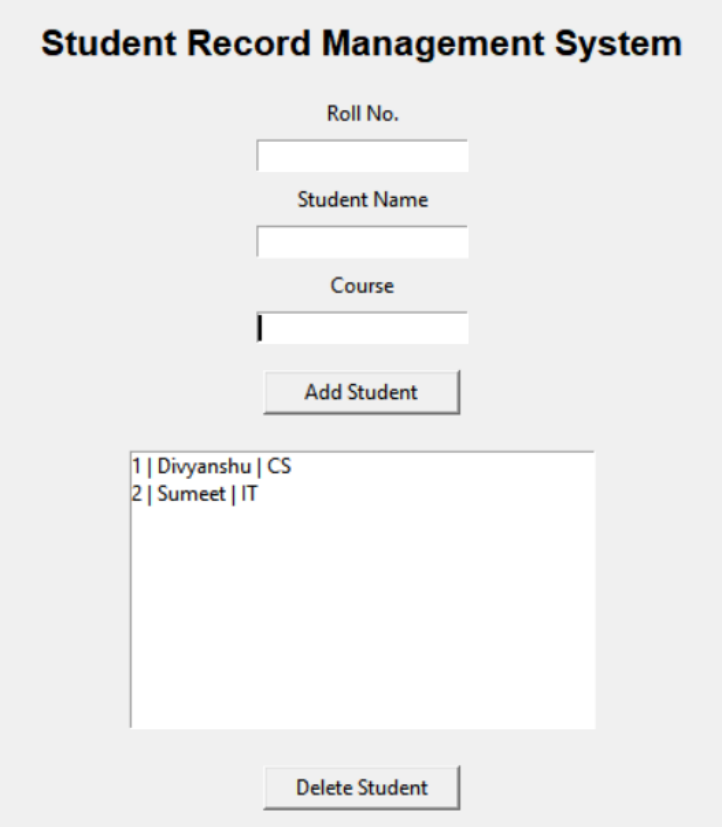

root.mainloop()
```

3. Output Screenshot:

Student Record Management System
Roll No.
Student Name
Course
Add Student
1 | Divyanshu | CS
Delete Student

Student Record Management System
Roll No.
Student Name
Course
Add Student
1 | Divyanshu | CS
2 | Sumeet | IT
Delete Student

5. Conclusions:

The Student Record Management System is a simple and useful Python project. It helps users add, display, and delete student records easily. This project also helps in understanding Python functions, Tkinter GUI, buttons, input fields, and listboxes.
